

NAAMES - C-130H Hercules #439 11/18/15 Science Report

Aircraft:

[C-130H Hercules #439](#) ([See full schedule](#))

Date:

Wednesday, November 18, 2015

Mission:

NAAMES

Mission Location:

St. John's, Canada

Mission Summary:

The fourth NAAMES science flight complements yesterday's southern survey by heading north to finally capture ocean remote sensing around Points S1 and S3 before heading south again to execute bowtie and cloud module maneuvers in the vicinity of the ship at Point S4. The ECMWF cloud forecast suggested that the entire northern end of the track would have relatively low cloud fraction today, which actually ended up being scattered-to-broken clouds throughout much of the region. Because of large overcast cloud features stretching from Points S1 to S2 the decision was made to deviate south from the flight plan by skipping Point S2 and working the more open cloud field just north of S1 and S3 at high-altitude with the ocean remote sensors. Although, the overcast skies over Point S2 eventually opened up later in the flight, the new flight leg nicely extended the coverage of the ocean remote sensing tracks in the vicinity of Points S1, S2, and S3. The C-130 carried out the northern leg of the bowtie near the current ship station in the eddy at Point S4, where it encountered open skies to the west and east of the leg and broken stratocumulus clouds in the middle of the bowtie leg. The aircraft then proceeded to carry out extensive low-level sampling in and around the ship as well as for a southern bowtie leg, before starting a cloud module to the southwest of the ship. The clouds in the area around Point S4 were observed to be layered and evolving rapidly with heavy drizzle, which complicated the cloud module legs. The pilots and science crew did an outstanding job of carrying out level cloud module legs while avoiding clear air aerosols impacted by drizzle. These efforts are evident in the meandering nature of the flight track as shown in the maps below. After completing the cloud module, the C-130 finished the high-altitude leg of the southern bowtie module before returning to base.

Submitted by:

Richard Moore on 11/23/15

Related Flight Report:

C-130H Hercules #439 11/18/15

Flight Number:

NAAMES Nov-2015 Data Flight #4

Payload Configuration:

NAAMES

Nav Data Collected:

No

Total Flight Time:

9.8 hours

Submitted by:

Cate Easmunt on 11/18/15

Flight Segments:

From:	CYYT	To:	CYYT
Start:	11/18/15 11:00 Z	Finish:	11/18/15 20:47 Z
Flight Time:	9.8 hours		
Log Number:	161006	PI:	Michael Behrenfeld
Funding Source:	Paula Bontempi - NASA - SMD - ESD Ocean Biology and Biogeochemistry		
Purpose of Flight:	Science		

Flight Hour Summary:

	161006
Flight Hours Approved in SOFRS	100
Total Used	64.5
Total Remaining	35.5

161006 Flight Reports

Date	Flt #	Purpose of Flight	Duration	Running Total	Hours Remaining
10/31/15	Airworthiness Test Flight	Check	1	1	99
11/04/15	Project Test Flight	Check	5.5	6.5	93.5
11/09/15 - 11/10/15	NAAMES Nov-2015 Transit to St.. John's	Transit	4.6	11.1	88.9
11/12/15	NAAMES Nov-2015 Data Flight #1	Science	9.9	21	79
11/14/15	NAAMES Nov-2015 Data Flight #2	Science	9.7	30.7	69.3
